FRONT COVER — Torres del Paine National park is in the Andes Mountains in southernmost Chile. The three torres (towers) are eroded remnants of a loccolith that arched up the overlying strata (black) and were glaciated during the Ice Age. The top of one of the towers is visible in the left central part of the photograph. Photo by Larry D. Fellows, CPG-04447.

There was an error in last months front cover photo credit, it should have read Larry D. Fellows, CPG-04447.
