ON THE COVER - Mills Glacier at the foot of Long's Peak east face, Rocky Mountain National Park, Colorado. Long's Peak at 14,255 ft is the only fourteener in Rocky Mountain National Park. Its distinctive summit rises a full 9,000 ft above the plains of northeastern Colorado. The east face of Long's Peak forms part of a magnificent cirque, with granite walls that soar. American Institute of Professional Geologists (AIPG) is the only national organization that certifies the competence and ethical conduct of geological scientists in all branches of the science. It adheres to the principles of professional responsibility and public service, and is the ombudsman for the geological profession. It was founded in 1963 to promote the profession of geology and to provide certification for geologists to establish a standard of excellence for the profession. Since then, more than 10,000 individuals have demonstrated their commitment to the highest levels of competence and ethical conduct and been certified by AIPG.

The mission of the American Institute of Professional Geologists (AIPG) is to be the superior advocate for geology and geologists, to promote high standards of ethical conduct, and to support geologists in their continuing professional development.

The Professional Geologist (USPS 590-810 and ISSN 0279-0521) is published bi-monthly by the American Institute of Professional Geologists, 1400 W. 122nd Ave., Suite 250, Westminster, CO 80234-3499. Periodicals Postage Paid at Denver, Colorado and additional mailing offices.

POSTMASTER: Send address changes to *The Professional Geologist*, AIPG, 1400 W. 122nd Ave., Suite 250, Westminster, CO 80234.
